## 1. Analysis of Business Results and Financial Position

### (1) Analysis of Business Results

### Operating results for the fiscal year ended March 31, 2015

During the fiscal year ended March 31, 2015, the Japanese economy remained on the road to a slow recovery, with an improving employment environment and corporate earnings on the rise backed by the economic policies and monetary easing of the government and the Bank of Japan. However, the future of the Japanese economy remains clouded amid price increases of imported materials, among factors, attributable to the yen's depreciation and the long-term decline in consumer spending following the hike in Japan's consumption tax.

In this economic environment, the France Bed Group (hereinafter, the "Group") sought to boost profitability. To this end, the Group engaged in initiatives for the further growth of the Medical Services Business, which included increasing the number of its sales offices and launching inimitable new products, to capture the ever-increasing needs of nursing care. In addition, the Group continued to focus on sales of high-performance products with high added value in the Home Furnishing and Health Business, in order to meet the needs of consumers with clearly defined lifestyle preferences.

The Group also sought to increase market penetration and sales of its Reha tech brand, geared mainly towards energetic seniors, through new product development and the cultivation of new sales channels, while also establishing a business model by starting the expansion of operation of model shops under the exclusive management of the Company.

As a result of these initiatives, strong performance was seen in the special needs equipment rental business under the Medical Services Business, which constitutes the Group's core business. However, it was offset by the struggle in sales to hospitals/facilities under the same Business and in the Home Furnishing and Health Business, primarily due to the effect of the decline following the consumption tax hike. Consequently, consolidated net sales for the fiscal year under review totaled 51,907 million yen (down 5.4% year on year). In addition to a decrease in net sales, consolidated operating income was 1,723 million yen (down 38.4% year on year) and consolidated ordinary income was 1,745 million yen (down 37.3% year on year), primarily owing to an increase in selling, general and administrative expenses such as net retirement benefit expenses included in personnel expenses and advertising expenses. Consolidated net income was 904 million yen (down 35.2% year on year) due to the following factors: the Group recorded a gain on sales of investment securities of 155 million yen as extraordinary income upon disposal of investment securities held by the Group; and the Group reversed its deferred tax assets and reported income taxes – deferred of 135 million yen following the revision to the tax law published on March 31, 2015 that gradually lowers the corporate tax rate.

The performance of each business segment is described below.

### 1) Medical Services Business

In the Medical Services Business, the Group made efforts to bolster its earnings capabilities through seeking an increase in net sales with a focus on rentals. The initiatives included opening three new sales offices (in Kyoto City of Kyoto Prefecture, Ota Ward of Tokyo, and Hiroshima City of Hiroshima Prefecture) and two logistics centers (in Katsushika Ward of Tokyo and Izumiotsu City of Osaka Prefecture) and introducing new products, for its special needs equipment rental business, where nursing care insurance payments are on the rise.

During the fiscal year under review, the Group started to newly introduce Low-Floor Reclining Bed FLB-03J Floor Bed into the home care field, in addition to the existing facilities field. The bed reduces the risk of falls and the burden on caregivers with a height adjustment function. In addition, the Group also sought to enlarge its customer base and acquire sales agents by focusing on increasing product awareness and creation of new demand through TV commercials and other advertising campaigns.

Other new products were also introduced to the market, including the electric reclining bed, which provides a sound signal at a preset back raising angle called the Sound Signaling Reclining Bed FBN-PJJSUL30, a mattress for the prevention of bedsores with a hardness and form appropriate to individual body parts for burden-reduction called SF-Pro, and the Legless Chair Type Lift Up Chair 800, which provides support for rising to one's feet from the floor, as well as a Japanese tatami mat.

In order to gain new sales, the Group launched the sales and rental of a new product under the Reha tech brand: the Smart Pal S637, the electric wheelchair with a steering wheel which provides easy riding as if it was a bicycle. Test drive events were held at numerous customer locations. At the same time, the Group sought to increase brand awareness and solidify the brand image by renovating directly managed stores offering nursing care equipment into Reha tech Shops and operating them as model shops.

The Group continually promoted sales of its products for hospitals and welfare facilities as well, such as the Monitoring Care System M-1, which reduces the burden on nursing staff and care workers by

detecting the bed user's movements (sitting up or getting out of bed) and sending notices to nurses' stations, etc., and the Low-Floor Floor Bed FLB-03, which reduces the risk of injuries from falls by bed users and reduces the burden on caregivers. However, factors including a decline in order, mainly due to the effects of the revision to the medical payment system in FY2014, and the decline following the last-minute rise in demand ahead of the consumption tax hike caused a decrease in net sales.

As a result of these initiatives, net sales for the Medical Services Business amounted to 28,397 million yen (down 3.3 % year on year), and operating income was 1,662 million yen (down 20.1 % year on year).

### 2) Home Furnishing and Health Business

In the Home Furnishing and Health Business, against the backdrop of increasing demand for luxury products by consumers, the Group sought to increase its earnings capabilities by continuing to bring high-performance products with high added value to the market in order to meet the needs of consumers with clearly defined lifestyle preferences and who demand quality sleep, as well as launching innovative, one-of-a-kind new products on the market to counter the decline following the last-minute rise in demand ahead of the consumption tax hike, and focusing on sales of these products.

The Group introduced to the market the New Reha tech Mattress RH-BAE, along with its related products, which provides a comfortable sleep in an ideal sleeping position with a combination of high-density continuous springs, and the BREATHAIR extra®, a new material for a mattress cushion jointly developed with TOYOBO, and increased product awareness through TV commercials and other advertising campaigns. In addition, the Group sought to create new demand through the sale of products and promotion campaigns commemorating the 65th anniversary of the founding of France Bed Co., Ltd. (hereinafter "France Bed"), the Company's consolidated subsidiary, in June 2015.

The Group also opened ERPO Gallery Roppongi, the flagship store for the sale of products from ERPO, a German company offering reclining sofas using top-grade leather, to appeal to consumers with demand for luxury products by offering products customizable according to the customers' preference.

In addition, the new headquarters was established in France Bed to supervise the hotel management divisions around Japan with the aim of increasing the Group's share as new demand from hotels, especially those in central urban locations, are expected in the future for the Tokyo Olympic Games to be held in 2020.

As for the Reha tech brand products, the Group worked on organizing events where customers could actually try out the products and setting up the Reha tech Corner, a space showcasing products for seniors, at specialty furniture stores that carry Group products, as well as at new sales channels.

Despite the Group's efforts to engage in these new initiatives to minimize the effects of the decline after the consumption tax hike, partly owing to the effect from the consumer slump after the consumption tax hike in the furniture retail market which turned out to be more prolonged than expected, net sales for the Home Furnishing and Health Business amounted to 20,000 million yen (down 7.7% year on year), and operating income was 99 million yen (down 86.2% year on year).

#### 3) Other

In the door-to-door sales business, the Group worked to ensure net sales by implementing measures for revitalization of sales staff which constitute the foundation of this business and actively seek to cultivate new stores for sales expansion of the Reha tech brand products.

In the commodities and sundries sales business, the Group reviewed the product lineups and changed the layout of store floors by studying such factors as store location and customer needs for each store, as well as conducting various sales events and clearance sales with a significant effect of attracting customers.

As a result of these initiatives, net sales for other business had net sales of 3,508 million yen (down 8.5% year on year), and an operating loss of 66 million yen (from operating loss of 32 million yen in the same period of the previous fiscal year).

### Outlook for Fiscal year ending March 31, 2016

For the fiscal year ending March 31, 2016, the Group expects the market for the Medical Services Business to continue to grow, as Japan's population continues to age. With the Home Furnishing and Health Business experiencing declining demand after the hike in the consumption tax, the Group will continue to sell high-performance products with high added value and introduce new products with inimitable attractive design to differentiate itself from competitors, thereby improving profitability. The Group will also seek to increase sales for hotels in central urban locations whose demands are expanding with the coming Tokyo Olympic Games by strengthening the organization and introducing

### new products.

In addition, the Group will expand sales routes for the Reha tech brand products targeting active seniors, including the Reha tech Shop, which is directly managed by us and the Reha tech Corner, which is managed by sales agents.

As a result of the above, the Group expects to achieve net sales of 53,500 million yen, operating income of 2,200 million yen, ordinary income of 2,150 million yen and a net income attributable to owners of parent of 1,100 million yen on a consolidated basis for fiscal 2016.

### (2) Analysis of Financial Position

1) Positions of total assets, liabilities and net assets

Total assets at the end of the fiscal year under review fell 33 million yen from the end of the previous fiscal year ("the previous year-end") to 59,409 million yen. Current assets declined 2,145 million yen from the previous year-end to 30,843 million yen. Major factors underlying this change included a decrease of 912 million yen in cash and deposits and a decrease of 1,417 million yen in notes and accounts receivable – trade (including electronically recorded monetary claims – operating), which offset an increase of 419 million yen in inventories. Non-current assets increased 2,118 million yen from the previous year-end to 28,505 million yen. Major factors underlying this change included an increase of 600 million yen in negotiable certificates of deposits, in addition to an increase in net defined benefit asset as a result of such factors as an increase in pension assets reflecting the rise in the market prices of stocks.

Liabilities decreased 1,798 million yen from the previous year-end to 22,122 million yen. Major factors underlying this change were decreases in notes and accounts payable – trade, accounts payable for factoring and long-term accounts payable – other, in the amounts of 767 million yen, 185 million yen and 698 million yen, respectively.

Net assets increased 1,765 million yen from the previous year-end to 37,287 million yen. Major factors for the increase included a net income of 904 million yen and remeasurements of defined benefit plans of 2,341 million yen, while major factors for the decline included dividends from surplus of 1,070 million yen.

As a result, shareholders' equity ratio rose to 62.7% from the 59.7% at the previous year-end.

### 2) Cash flow position

As for the cash flows for the fiscal year under review, cash and cash equivalents decreased 312 million yen from the previous year-end to 9,712 million yen. Details of individual cash flow items are as follows.

### (Cash flows from operating activities)

Net cash provided by operating activities came to 4,216 million yen (3,241 million yen in the same period of the previous fiscal year), due primarily to inflows including income before income taxes and minority interests of 1,890 million yen, the reporting of depreciation (a noncash item) of 3,638 million yen and the collection of 1,479 million yen in notes and accounts receivable – trade, offsetting outflows including an increase in inventories of 419 million yen, the payment of notes and accounts payable – trade of 767 million yen, 789 million yen in funds transfer resulting from transition to a defined-contribution pension plan and 481 million yen in income taxes paid.

### (Cash flows from investing activities)

Net cash used in investing activities totaled 3,501 million yen (2,550 million yen in the same period of the previous fiscal year), due primarily to inflows including proceeds from sales of investment securities of 244 million yen, which were offset by outflows including a purchase of property, plant and equipment of 3,330 million yen and a purchase of intangible assets of 431 million yen.

### (Cash flows from financing activities)

Net cash used in financing activities was 1,026 million yen (2,165 million yen in the same period of the previous fiscal year), primarily due to cash dividends paid of 1,070 million yen.

  - 2. Total market capitalization has been calculated on the basis of the number of shares issued excluding treasury shares.
  - 3. Cash flow refers to cash flows from operating activities.
  - 4. Interest-bearing debt includes all liabilities reported on the consolidated balance sheet on which interest is paid.

### (3) Fundamental Policy for Distribution of Earnings, and Fiscal 2015 and Fiscal 2016 Dividends

To maximize its shareholder value, the Company regards profit distribution as one of its key management priorities. The Company decides its dividend by comprehensively taking into account its performance, operating environment and the necessity of a strong balance sheet, in line with its fundamental policy of making every effort to maintain a stable dividend payment.

Based on this policy, the Company, as announced on May 15, 2014, plans to pay a year-end dividend of 2.25 yen per share for Fiscal 2015. As a result, the Company's annual dividend for the fiscal year under review will amount to 4.50 yen per share, which includes 2.25 yen per share already paid as the interim dividend.

The Company plans to place this matter on the proposal of the ordinary general shareholders' meeting scheduled for June 2015.

Additionally, for Fiscal 2016, the Company plans to pay an interim dividend of 2.50 yen per share and a year-end dividend of 2.50 yen per share, without factoring in the consolidation of shares, for an annual dividend of 5.00 yen per share. The Company expects the year-end dividend for Fiscal 2016 to be 12.50 yen per share, if the consolidation of common shares at a rate of one share for every five shares to become effective October 1, 2015, subject to the approval of the 12th Ordinary General Meeting of Shareholders to be held on June 24, 2015, is factored in.

### (4) Business and Other Risks

Risks that may affect the business results, financial position, stock prices, etc. of the Group includes the following.

Matters in the text relating to the future are judgments made by the Group at the end of the fiscal year under review.

- 1) Business environment of the Group
- a) The Group's Medical Services Business relies greatly on the nursing care insurance system. Revisions or changes to this system could reduce net sales and affect the Group's performance and financial position.
- b) The markets for suppliers and customers of the Group's Home Furnishing and Health business tend to be susceptible to influences, such as economic trends, land price fluctuations and a housing tax system. Demand in these markets can drop from such factors as reductions in income due to economic downturns, rises in market interest rates, land prices or housing taxes. Falling demand could trigger a drop in net sales and slimmer profit margins due to lower sales prices in product lines, and could thus lead to worsened business conditions for the suppliers and customers of the Group. The downward trend could also affect the Group's performance and financial position due to the occurrence of bad debts and other problems.
- c) In the other business, door-to-door sales business is regulated by law. Changes to the relevant laws could cause net sales to fall, and affect the performance and financial position of the Group. Additionally, performance in the commodities and sundries sales business is affected by consumer sensibility and fashion sense, as well as price lines and the store environment. If the Group is unable to predict changes in the market and offer appealing products, its net sales could fall, affecting the

Group's performance and financial position.

### 2) Product defects

The Group manufactures its various products at Group factories in accordance with JIS (Japanese Industrial Standards) as well as FES (Francebed Engineering Standards), which are based on the Group's own quality criteria that are even stricter than JIS.

However, there is no guarantee that defects will not occur in any of the products. Moreover, while the Group holds product liability insurance, there is no guarantee that this insurance will ultimately be sufficient to cover the amount of compensation to be borne, and the Group may not always be able to continue holding such insurance.

In the event that a product defect occurs for which the Group bears liability, or if a large-scale recall is carried out in the interests of customer safety, or in other such circumstances, substantial costs may be incurred by the Group. This could cause significant damage to our product reputation and brand, potentially resulting in lower net sales and affecting the Group's performance and financial position.

### 3) Unauthorized disclosure of personal information, etc.

Because of the nature of its business, the Group handles a large volume of personal information such as customer information. The Group pays particular attention to protection of personal information in the conduct of its business activities, and takes measures to protect confidentiality. However, if a leak of personal information were to occur, the Group could be held legally responsible, and it could experience a major loss of credibility that could affect its performance and financial position.

### 4) Credit

The Group engages in a range of business transactions and bears credit risk that could result in losses such as those incurred due to a supplier's or customer's worsened credit standing or bankruptcy.

In order to control that risk, the Group has set a credit limit and payment method for each supplier and customer, and has set up a committee for the protection of accounts receivable to flexibly manage credit risk.

However, because it is difficult to eliminate all such risks, the Group's performance and financial position could be adversely affected in the event of deterioration in credit standing or bankruptcy, etc., of a supplier or customer.

### 5) Exchange rate fluctuation, etc.

The Group engages in import and export transactions of raw materials and the manufactured products, and bears the risk of fluctuations in the exchange rate with regard to related

foreign-currency-denominated monetary claims and obligations (including foreign currency options). The Group therefore conducts derivative transactions for the purpose of hedging risks associated with exchange rate fluctuations, but it is difficult to completely eliminate all such risks, including indirect impact of exchange rate fluctuations. It is therefore possible that the Group's performance and financial position could be affected by exchange rate fluctuations.

In addition, the Group carries out import and export transactions with multiple countries mainly in Asia and Europe, and will continue to do so. Therefore, the Group's performance and financial position could be affected by deterioration of the import-export environment due to changes in the economic situation, occurrence of disasters, etc. in each country.

### 2. Corporate Group

The Company's corporate group consists of the Company, nine subsidiary companies (five consolidated subsidiaries and four non-consolidated subsidiaries), and one affiliate, and mainly engages in the Medical Services Business and the Home Furnishing and Health Business.

The Group's businesses and relationship between its businesses and Group companies are described below.

The classification of business segments in the Segment Information is the same as one applied below.

Business segments	Business activities	Group companies
Medical Services	Manufacture, purchase,	France Bed Co., Ltd.

Notes 1. FB Tomonokai Co., Ltd., a subsidiary of the Company's subsidiary, France Bed Sales Co., Ltd., solicits members based on contracts for specified prepaid transactions relevant to products marketed by France Bed Sales Co. and mediates product sales to such members.

2. Major non-consolidated subsidiaries and companies not accounted for by the equity method: Tsubasa Co., Ltd., France bed International (Thailand) Co., Ltd., Jiangsu France Bed Co., Ltd., and France Bed Medical Service Co., Ltd.

Tsubasa Co., Ltd., France Bed International (Thailand) Co., Ltd., Jiangsu France Bed Co., Ltd., and France Bed Medical Service Co., Ltd. have been excluded from the scope of consolidation and from the scope of application of the equity method since they are small in size and their amounts in terms of total assets, net sales, net income or loss (amount corresponding to equity interest) and retained earnings (amount corresponding to equity interest), etc. do not materially impact the consolidated financial statements.

### [Operating Structure]

The figure below illustrates the Group's operating structure. Only major business relationships are included.

### 3. Management Policies

### (1) Basic Management Policies of the France Bed Group

The Group holds as its corporate philosophy, "France Bed aims to be an affectionate company that helps people live affluent, relaxing lives through creation and innovation." and will endeavor to provide new and highly valuable products and services that will provide satisfaction to our consumers.

The Group is committed to strengthening the group's overall power and increasing its corporate value through the efficient utilization of the management resources of each Group company.

### (2) Our Tasks Ahead

According to Japan's Cabinet Office, Japan's elderly population, aged 65 or older, will be 33,950,000 in 2015, when the baby boom generation reaches the age of 65 or older, and is expected to amount to 36,570,000 in 2025 when the baby boom generation reaches the age of 75 or older.

In these circumstances, the Group recognizes that its top management challenge is continual growth of the special needs equipment rental business, the Group's core business, by winning the ever-increasing needs for nursing care. On the other hand, since the senior-oriented business is one of the only fields where domestic demand is growing, competition is expected to grow increasingly fierce, including entries into the market from other industries. In this business climate, in addition to continually developing and introducing to the market new inimitable products/services fulfilling customer needs by utilizing the Group's expertise and management resources as the pioneer in the business in Japan, the Group will also establish and expand sales offices, service centers and other business bases to increase the market share and further solidify the business foundation.

In addition, as the birthrate declines and the population ages rapidly, the nursing care insurance system is expected to go through various reforms to maintain its sustainability, and the Group expects such reforms to affect its revenue structure.

To this end, in October 2010 the Group developed and launched its first product under the Reha tech brand: the ASU-3W01 electrically assisted tricycle. Since the launch of its inaugural product, the Group has expanded its line of Reha tech products aimed at helping energetic seniors, i.e., "active seniors," lead more active, fun and comfortable lives. One example is the Light Cane; launched in December 2013, a walking cane with a light that helps users see where they are stepping. The Group will increase the number of the Reha tech Shops, directly managed stores, and the Reha tech Corner, stores managed by sales agents, as the store where seniors may readily visit and see the products described above in order to expand brand awareness and sales of products, thereby proceeding with establishment of a revenue base not overly dependent on the nursing care insurance system in the business targeting seniors.

In the Home Furnishing and Health Business, whose market has matured, the Group will seek a shift "from quantity to quality" to establish a business model gaining revenue in a stable manner. For that purpose, the Group will develop high-performance products and new products with inimitable original design and forward the method of production on order with diversified small-quantity production system. In addition, the Group will seek to increase sales in the hotel market where demands are expanding with the coming Tokyo Olympic Games, by initiatives including strengthening of the internal organization.

Through the initiatives described above, the Group aims to become a group of "companies that offer an aging society a realization of a rich lifestyle that allows people to lead active lives, and contribute to society through the continual provision of advanced original products/services at all times" by strengthening its approaches to senior-oriented businesses.

### (3) Other Important Matters Related to Management

Not applicable

### 4. Basic Approach to the Selection of Accounting Standards

The Group applies the J-GAAP as accounting standards in order to ensure comparability of its consolidated financial statements from period to period and between entities.

The Group will address the application of the International Financial Reporting Standards (IFRS) appropriately upon taking into account various circumstances both in Japan and abroad.

### (5) Notes to the Consolidated Financial Statements (Notes to the Going Concern Assumption) Not applicable

### (Basis of Presentation of Consolidated Financial Statements)

- 1. Scope of Consolidation
- (1) Number of consolidated subsidiaries: 5

Names of consolidated subsidiaries France Bed Co., Ltd. France Bed Furniture Co., Ltd. France Bed Sales Co., Ltd. FB Tomonokai Co., Ltd. Tokyo Bed Co., Ltd.

(2) Names of non-consolidated companies

Tsubasa Co., Ltd. France Bed International (Thailand) Co., Ltd. Jiangsu France Bed Co., Ltd. France Bed Medical Service Co., Ltd. (Reason for exclusion from the scope of consolidation)

The non-consolidated subsidiaries have been excluded from the scope of consolidation since they are all small in size and their total amounts in terms of total assets, net sales, net income or loss (amount corresponding to equity interest) and retained earnings (amount corresponding to equity interest) do not materially impact the consolidated financial statements.

### 2. Application of the Equity Method

The major non-consolidated subsidiaries and affiliates (Tsubasa Co., Ltd., France bed International (Thailand) Co. Ltd., Jiangsu France Bed Co., Ltd., and France Bed Medical Service Co., Ltd.) are not accounted for by the equity method, since their exclusion has a minor impact on the consolidated financial statements in terms of net income or loss (amount corresponding to equity interest) and retained earnings (amount corresponding to equity interest) and is considered immaterial from the overall perspective.

3. Fiscal Year of the Consolidated Subsidiaries

The fiscal year end dates of all consolidated subsidiaries coincide with the consolidated fiscal year end date.

4. Notes on Accounting Standards

- (1) Standards and methods for asset valuation
- 1) Securities

Available-for-sale securities

Fair value available:

Stated at market value as of the consolidated fiscal year end date (The valuation difference is charged to net assets using the direct transfer to capital method, with the cost of securities sold calculated by the moving average method.)

Fair value not available:

Stated at cost determined by the moving average method

### 2) Derivatives

Stated at fair value

- 3) Inventories
- a. Merchandise, finished goods and work in process

Mainly stated at cost determined by the first-in first-out method (Balance sheet amount is calculated by writing down the book value based on the decline in profitability.)

b. Raw materials and supplies

Stated at cost determined by the last purchase price method (Balance sheet amount is calculated by writing down the book value based on the decline in profitability.)

- (2) Depreciation method used for calculating depreciable assets
- 1) Property, plant and equipment (excluding lease assets)
  - The declining balance method is applied.
  - The estimated useful lives of assets are principally as follows:

Assets for lease: 3–10 years

Buildings and structures: 2–55 years

Machinery, equipment and vehicles: 2-13 years

Tools, furniture and fixtures: 2–20 years

Small-amount assets for lease whose acquisition cost is less than ¥200,000 are equally amortized over three years as lump-sum depreciable assets.

- 2) Intangible assets (excluding lease assets) The straight-line method is applied. Software for internal use is amortized using the straight-line method over the estimated usable period for office use (five years).
- 3) Lease assets

Lease assets are amortized on the straight-line method over the lease period of the leased assets, assuming the lease period as the useful life and no residual value.

### 4) Long-term prepaid expenses

Long-term prepaid expenses are equally amortized over the years.

- (3) Accounting standards for significant allowances and provisions
- 1) Allowance for doubtful accounts

The allowance for doubtful accounts is provided at an amount of possible losses from accounts receivable – trade and other receivables, based on the historical write-off ratio for general receivables and on the individual collectability for specific receivables such as receivables with default possibility.

2) Provision for bonuses

The provision for employees' bonuses is provided at the amount borne for the fiscal year under review of the estimated amounts to be paid.

3) Provision for directors' bonuses

The provision for directors' bonuses is provided at an amount based on the amount estimated to be paid in respect of the fiscal year under review.

4) Provision for directors' retirement benefits

The provision for directors' retirement benefits is provided at an amount required to be paid at the end of the fiscal year, based on internal regulations.

5) Provision for contingent loss

The provision for contingent loss is provided at an amount considered necessary, with a reasonable estimate for possible future contingencies.

- 6) Provision for loss on dissolution of employees' pension fund To provide for possible losses related to the dissolution of the employee's pension fund in which certain consolidated subsidiaries participate, the estimated amount of loss at the end of the fiscal year under review is recorded.
- (4) Accounting method for retirement benefits
- Method for attributing expected retirement benefits to periods of service In calculating the amount of retirement benefit obligations, the straight-line basis is adopted for attributing estimated retirement benefits over the period up to the end of the fiscal year under review.

2) Treatment of actuarial gains or losses

Actuarial gains or losses are amortized using the straight-line method over a certain number of years (primarily 10 years) within the average remaining years of service of the eligible employees at the time of recognition, and allocated proportionately from the fiscal year following the respective fiscal year of recognition.

- 3) Methods of accounting for unrecognized actuarial gains or losses
- Unrecognized actuarial gains or losses are recorded after adjustments for tax effects, as remeasurements of defined benefit plans under accumulated other comprehensive income in net assets.
- 4) Adoption of the simplified method by companies that are small in size Certain consolidated subsidiaries, in the calculation of defined benefit liability and retirement benefit expenses, apply the simplified method in which the amount to be required at the year-end for voluntary termination is recorded as retirement benefit obligations.
- (5) Significant hedge accounting
- 1) Method of hedge accounting

Deferral hedge accounting has been adopted. The designation of hedges is applied to certain monetary receivables and payables denominated in foreign currencies hedged by forward exchange contracts.

- 2) Hedging instruments and hedged items
- a. Hedging instruments

Derivative transactions (currency option transactions and forward exchange contracts)

b. Hedged items

Monetary receivables and payables denominated in foreign currencies exposed to exchange rate fluctuation risk (including foreign currency denominated forecasted transactions).

3) Hedging policy

Derivative transactions are conducted mainly for the purpose of hedging the foreign exchange fluctuation risks associated with imports of raw materials and merchandise. In undertaking derivative transactions, they are controlled so that the hedge ratio is maintained to be not less than a certain level with the planned transaction amount as the maximum limit.

- 4) Method of evaluating hedge effectiveness
- a. Test in advance

Verifies whether the transaction is consistent with Market Risk Management Rules and Risk Management Guidelines

b. Post testing

Verifies that the market and cash flow fluctuations were avoided, for exchange rate fluctuation risk in foreign currency denominated transactions.

(6) Scope of cash and cash equivalents in the Consolidated Statements of Cash Flows Cash and cash equivalents are composed of cash on hand, deposits that can be withdrawn at any time and short-term investments that are readily convertible into cash and face only slight risks of fluctuation in value with redemption due dates arriving within three months from the acquisition date.

(7) Treatment of deferred assets

Bond issuance cost is amortized over the redemption period using the straight-line method.

(8) Other significant matters for preparing consolidated financial statements

Accounting for consumption tax

The tax exemption method is adopted for consumption tax and local consumption tax.

Non-deductible consumption taxes related to non-current assets are treated as periodic expenses attributable to the fiscal year under review.

### (Changes in Accounting Policies)

(Adoption of accounting standards related to retirement benefits)

Effective from the fiscal year under review, the "Accounting Standard for Retirement Benefits" (Accounting Standard Boards of Japan (ASBJ) Statement No. 26, May 17, 2012, hereinafter, the "Retirement Benefits Accounting Standard") and the "Guidance on Accounting Standard for Retirement Benefits" (ASBJ Guidance No. 25, March 26, 2015, hereinafter, the "Retirement Benefits Guidance") have been adopted in respect of the provisions specified in the main clause of Paragraph 35 of the Retirement Benefits Accounting Standard and the main clause of Paragraph 67 of the Retirement Benefits Guidance, whereby the method of calculating retirement benefit obligations and service costs has been reviewed. Consequently, the method of attributing expected retirement benefits to periods of service has been changed from the straight-line basis to the benefit formula basis, while the method of determining discount rates has been changed from the average remaining years of service of the eligible employees, to the method using a single weighted average discount rate reflecting the estimated timing of retirement benefit payments, and the amount of retirement benefit payments for each estimated payment period.

The Retirement Benefits Accounting Standard is applied in line with the transitional measurement set forth in Paragraph 37 of the Retirement Benefits Accounting Standard, and accordingly, the amount of the effects of this change in the calculation method of retirement benefit obligations and service costs has been added to or deducted from retained earnings as of the beginning of the fiscal year under review.

As a result, net defined benefit assets decreased by 854 million yen, net defined benefit liability increased by 43 million yen, and retained earnings decreased by 599 million yen, as of the beginning of the fiscal year under review. In addition, operating income, ordinary income and income before income taxes and minority interests of the fiscal year under review each increased by 27 million yen.

Net assets per share decreased by 2.79 yen and net income per share increased by 0.12 yen for the fiscal year under review.

### (Changes to Presentation)

(Consolidated Balance Sheets)

Since the monetary significance of electronically recorded monetary claims – operating, which was included in notes and accounts receivable – trade under current assets in the previous fiscal year, has increased, the account item is presented separately in the fiscal year under review. The consolidated financial statements for the previous fiscal year have been reclassified to reflect this change in presentation.

As a result, 12,350 million yen that was stated as notes and accounts receivable – trade under current assets in the consolidated financial statements for the previous fiscal year has been reclassified into 11,857 million yen of notes and accounts receivable – trade and 493 million yen of electronically recorded monetary claims – operating.

### (Supplementary Information)

Revisions to the amounts of deferred tax assets and deferred tax liabilities in accordance with the changes in the corporate tax rates

Following the promulgation of the "Act for the Partial Revision of the Income Tax Act, etc." (2015, Act No. 9) and the "Act for the Partial Revision of the Local Tax Act, etc." (2015, Act No. 2) on March 31, 2015, the corporate tax rates for the fiscal years starting on and after April 1, 2015 have been lowered. In conjunction with this change, the statutory effective tax rate used in the calculation of deferred tax assets and deferred tax liabilities has been changed from the previous 35.6% to 33.1% for temporary differences expected to be reversed in the fiscal year starting on April 1, 2015, and to 32.3% for those expected to be reversed in or after the fiscal year starting on April 1, 2016.

As a result, deferred tax assets (net of deferred tax liabilities) decreased by 25 million yen, and income taxes – deferred, valuation difference on available-for-sale securities and remeasurements of defined benefit plans increased by 135 million yen, 8 million yen and 101 million yen, respectively.

### (Segment Information)

1. Summary of reporting segments

The reporting segments of the Group are those units for which separate financial information can be obtained among the constituent units of the Group, which is regularly examined by the Board of Directors in order to determine the allocation of management resources and assess business performance.

The Group identifies the business segments based on similarities in the products and services provided and other factors. It has two reporting segments: the Medical Services Business and the Home Furnishing and Health Business.

The main products and services of each reporting segment are as follows. Medical Services:

Manufacture, purchase, rental, retail sale and wholesale of medical and nursing care beds and care equipment, and linen supply for hospitals, hotels, etc.

Home Furnishing and Health:

Manufacture, purchase and wholesale of beds, furniture and bedding, etc.

2. Method of calculating net sales, income or loss, assets and other items by reporting segments Methods of accounting procedures for reporting business segments are the same as those for statements in "Basis of Presentation of Consolidated Financial Statements." Income (loss) of reporting segments is the figure based on operating income. Intersegment revenues and transfers are based on prevailing market prices.
